

Austria jtpv solar

We're honored to announce that #JTPV has soared to the global TOP2 position in solar cell shipments for H1 2024, as reported by InfoLink Consulting. This leap from fifth place in 2022 is a testament to our industry-leading market presence and technological excellence.

#JTPV (Drinda) is proud to announce that we secured a spot on the Top 10 solar cell manufacturers by production! With a 40 GW N-type cell production capacity and a market-leading 57.4% share in 2023, we're driving efficiency and quality in solar energy.

The company continues to work on improving its n-type solar cells, signalled by the launch of its new TOPCon (tunnel oxide passivated contact) product "MoNo 1", with a conversion efficiency of ...

As a high-tech enterprise, Jietai Solar specializes in the R& D, design, manufacturing, and sales of high-efficiency solar cells. Capitalizing on its substantial technical foundation, the company has achieved a milestone as the industry's first specialized manufacturer to achieve large-scale production of N-type solar cells, spearheading ...

As of the end of Q1 this year, JTPV had seen overseas sales increase from 0.29% to 11.6% of its total sales, with An's presentation focusing on zero busbar and half-cut edge passivation (HEP ...

As the pioneer of N-type solar cell, JTPV is committed to elevating conversion efficiency and yield. Our "MoNo 1" series solar cells have set a new benchmark with a 26.3% efficiency and 732mV open-circuit voltage. The "MoNo 2" series, with its half-cut design, achieves a $\geq 90\%$ bifacial rate, enhancing module power by 5-9W.

Austria's Federal Association of Photovoltaics (PV Austria) says the nation added 500 MW of new solar capacity in the first quarter, driven by investments in private rooftop PV systems...

Solar potential As of the end of 2022, solar power in Austria amounted to nearly 3.8 gigawatt (GW) of cumulative photovoltaic (PV) capacity, with the energy source producing 4.2% of the nation's electricity.

Austria installed 1.4 GW of new PV capacity from January to September 2024, including around 400 MW added in the third quarter alone.
