

Boson energy sa Mozambique

Who is boson energy?

BOSON ENERGY builds execution capacity and presence in markets together with global and local partners. Our global strategic partners include Siemens Energy, Doosan-Lentjes, and Thermax. They are actively involved in the work to standardise and modularise our system to achieve maximum speed and quality in rollout and execution.

Is boson energy a force-fitting technology?

Not at all. Boson Energy is part of a new generation of technologies that are not force-fitted into the energy transition and decarbonisation, but rather built for that very purpose.

Can boson change the value of waste?

Boson and our global partners are starting this radical shift, city-by-city, to change the role and value of waste globally. Forever. Siemens and Boson Energy enter agreement to accelerate the green energy transition through waste-to-hydrogen (to-X) technology.

Does boson energy have a 'non-recyclable' waste?

Boson Energy wins Hydrogen Production Category at Tech Tour Sustainability 2022 Finals in Essen, Germany. From a field of 800 applying startups, some 400 selected... That means recycling more than 10 million tons of 'non-recyclable' waste - and enough Hydrogen to keep 100,000 zero-emission buses or trucks on the road. Join our journey.

What is boson energy's seal of Excellence?

The Seal of Excellence was awarded to Boson Energy, as part of the European Innovation Council (EIC) grant application process. The Seal of Excellence is... PRESS RELEASE | 2023-06-29 The port of Wallhamn AB on the island of Tjörn plots a course towards local production of energy and green...

Who is boson - the imby company?

The company was founded on research that Prof Blasiak started already in the 80s, with the vision to produce local hydrogen directly from biomass and waste. Based on Prof Blasiak's original conviction that clean and small-scale is the future; Boson is 'The IMBY Company' - for In My Back Yard. Clean air for future generations.

Hynion AS and Boson Energy SA have signed a Letter Of Intent to jointly evaluate the conditions for the coordinated establishment of facilities where Hynion will supply hydrogen refueling stations to distribute the hydrogen produced by Boson Energy through the gasification of waste.

BOSON ENERGY is rolling out the next generation of sustainable waste-to-energy solutions that turn a wide range of mixed and hazardous wastes and biomass into energy for direct local use. Our zero-waste

technologies also ...

Boson Energy has developed an integrated proprietary reactor where drying, slow pyrolysis, gasification, and vitrification happen with a slow temperature gradient and driven by gravity rather than moving parts. This gives our technology ...

Clean air for future generations. Solving the world's waste problem. Too ambitious? Not at all. Boson Energy is part of a new generation of technologies that are not force-fitted into the energy transition and decarbonisation, but ...

Boson Energy has developed an integrated proprietary reactor where drying, slow pyrolysis, gasification, and vitrification happen with a slow temperature gradient and driven by gravity rather than moving parts. This gives our technology unique ability to deliver syngas with high quality and stability, despite variations in waste composition and ...

Boson Energy is an enabler of true decarbonization and zero-emission transport: We are on a path path towards 1 million tons of Circular Hydrogen by 2030 Climate tech building capacity to save 25M tons of CO2 per year by 2030 - by ...

Boson Energy is a developer of technology, solutions and projects for recycling otherwise non-recyclable waste and biomass into 1) carbon-negative Hydrogen, H2-powered fast charging, H2-powered grid support; 2) green molecules like methanol, ammonia, and urea; 3) green CO2 to replace fossil CO2 in vertical farming, food and beverages and other ...

Drive Your energy and chemicals transition with Next Gen Waste-to-X Our mission is to turn local non-recyclable waste into a clean driver of local energy security and reduced infrastructure stress - while improving air quality, environment, and carbon footprint.

Transform otherwise non-recyclable waste into clean, local, carbon negative, affordable H2, green molecules, and power | Boson Energy is a developer of technology, solutions and projects for...

Member - BOSON ENERGY SA. Go back. Thermochemical recycling turning waste and biomass into clean and affordable local Hydrogen, power, heat and cooling. Type Startup or self-employed. Founded 2008. Company Size 25. Member Type. innovator. Founders Jan Grimbrandt, Wlodzimierz Blasiak, Liran Dor.

BOSON ENERGY is rolling out the next generation of distributed sustainable waste-to-energy solutions that turn a wide range of mixed and hazardous wastes and biomass into renewable 24/7 Hydrogen and energy for direct local use. ...

decarbonisation, but rather built for that very purpose.

BOSON ENERGY is rolling out the next generation of distributed sustainable waste-to-energy solutions that turn a wide range of mixed and hazardous wastes and biomass into renewable 24/7 Hydrogen and energy for direct local use. Our zero-residues technology also produces value added material rather than toxic ash requiring further treatment.

BOSON ENERGY is rolling out the next generation of sustainable waste-to-energy solutions that turn a wide range of mixed and hazardous wastes and biomass into energy for direct local use. Our zero-waste technologies also produce value added material rather than toxic ash requiring further treatment.
