respectively. The results showed that solar pump-ing system is a reliable system. Keywords: Photo-irrigation, water pumping, drip irrigation, solar radiation. INTRODUCTION Solar energy is the most exuberant source of energy in the world. PV (photovoltaic modules) generation is an effective approach for utilization the solar energy.

No Zesa, No problem! The solar borehole kit is a water pumping system that draws power from the most widely available resource, the sun! - No Batteries Required - Maintenance Free - Simple to...

Agric. Eng. Res. Inst. &quot;AEnRI&quot;; Agric. Res. Center, Doki - Giza - Egypt. ABSTRACT Utilization photovoltaic cells for water pumping is one of the most techniques in solar energy applications. Design and performance analyze of solar energy for pumping water through drip irrigation system are studied the field experiment was conducted
