

Can the Isle of Man rely on gas and oil?

It's clear that like all leading economies the Isle of Man cannot rely on gas and oil indefinitely. While the island's target to achieve net-zero by 2050 may seem far away, most of us worry about the current price of energy. Graph showing options to generate renewable power, store energy and utilise power on the Isle of Man.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

Will the Isle of Man be short of baseload power?

Both UK and RoI are predicted to become short of baseload power over the next decade. Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export.

Will Cura tighten gas regulations on the Isle of Man?

Steps are being explored to tighten regulations for customers consuming large amounts of gas, the Isle of Man's energy regulator has confirmed. Domestic gas supplied on the island has been regulated by the Communications and Utilities Regulatory Authority (CURA) since 2021.

What drives peak demand projections on the Isle of Man?

Peak demand projections are driven by total electricity demand on the Isle of Man. As a result, projections for peak demand follow a similar trend to the IoM total electricity demand projections. Initially, peak demand falls slightly across all scenarios, due to energy efficiency gains.

How has electricity demand changed on the Isle of Man?

The annual electricity demand on the Isle of Man has gradually declined since 2012. Between 2012 and 2019, annual demand decreased by 17 GWh, or approximately 5%. The drop in annual electricity demand has been driven by decreases in residential and commercial demand; however, industrial demand has increased.
