

Japan 250 watt solar panels price

\$50/panel for 250w panels isn't a great deal. I've searched across the country on marketplace and you can have used panels almost everywhere for about \$20 per 250w panel. Used vs new, at 11 years old, isn't going to make much of a difference. I have used 240w's that are 10 years old and still pull at nearly 100%.

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Based on various information, a solar panel price in Japan ranges from 200,000 to 400,000 yen per kilowatt (kW).

In 2022, the average sales price for solar photovoltaic (PV) modules amounted to 47 Japanese yen per watt, reaching a decade low. [Skip to main content Statista Logo](#)
