

Jersey Electricity has begun offering a roof top solar panel package for customers switching away from oil and gas heating. "The Solar Smart bundle" give households ...

Absolute Solar has been installing solar panel systems for over 15 years working with the leading solar PV brands to install high performing solar panel systems saving homeowners money on their utility bills. Our award winning installation process designs and delivers solar panel systems that meet customers needs.

Produce your own energy, save money & reduce your carbon footprint with Sunworks - Jersey's first dedicated energy optimisation provider. With over 550 local solar installations we are the trusted choice for homeowners and businesses wanting to invest in the future.

Powering 5000 homes is the equivalent of generating 36MWp of electricity from various solar voltaic sources - enough to power around 10% of housing in Jersey. Solar currently accounts for less than 0.5% of Jersey's current energy ...

Solar PV loves the sun. Solar PV systems work best in full sunlight. They can work on cloudy days but the stronger the sunshine, the more electricity they generate. Other factors which affect performance include: Time of day; Angle of the sun; System orientation; Cloud and shade cover

JE will arrange the installation contract through SunWorks to supply, install, commission and operate the solar at no cost to the property owner. This means the building is being used for its large roof space to generate electricity and could be seen as a rooftop "solar farm".

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon ...

Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save over a tonne and a half of carbon dioxide per year - that's more than 30 tonnes over its lifetime.

Harness the energy from our own domestic solar installation to power your home's appliances and heat your hot water with our unique Smart Solar offer, when switching to electric heating. Jersey's Rooftop Revolution

Jersey Electricity has confirmed it will develop a ground-mounted solar PV farm near Sorel Point, Jersey, which includes an approximate 3MWp array. Having previously focused on roof-based solar that provides renewable energy to the grid, Jersey Electricity is now expanding into strategically placed ground-mounted solar in a bid to increase the ...

Jersey absolute solar

Solar PV loves the sun. Solar PV systems work best in full sunlight. They can work on cloudy days but the stronger the sunshine, the more electricity they generate. Other factors which affect performance include: Time of day; Angle ...

Powering 5000 homes is the equivalent of generating 36MWp of electricity from various solar voltaic sources - enough to power around 10% of housing in Jersey. Solar currently accounts for less than 0.5% of Jersey's current energy generation. Achieving the Solar 5000 ambition would increase it to 6.5% of the energy share, all generated locally.

JE will arrange the installation contract through SunWorks to supply, install, commission and operate the solar at no cost to the property owner. This means the building is being used for its large roof space to generate electricity and ...

Harness the energy from our own domestic solar installation to power your home's appliances and heat your hot water with our unique Smart Solar offer, when switching to electric heating. ...

Jersey Electricity has begun offering a roof top solar panel package for customers switching away from oil and gas heating. "The Solar Smart bundle" give households the option of using energy from the sun to heat their hot water system via a rooftop array. It is aimed at households already moving away from fossil fuels to electricity.
