

Is solar energy efficient in Macao?

However, in the view of Macao-based scholar Wai Ming To, interviewed later in this special report, "Macao is a small city and has many high-rise buildings. Thus, solar energy is not efficient due to the shadowing effect of adjacent buildings and the small ratio of rooftop area to total floor area.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

Does Macao have a photovoltaic energy contract?

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period.

Does Macao have a climate problem?

As a commercial hub, Macao faces the same challenge. Energy consumption from electricity, transport and buildings accounts for nearly 90 per cent of Macao's carbon emissions directly caused by fossil fuels. With climate change posing grave threats to the future of society, city leaders say they have made reducing emissions a priority.

How many photovoltaic interconnections have been completed in Macao?

In response to a written inquiry from Macao News, the Environmental Bureau said that only five photovoltaic interconnections were completed by the end of March 2021. Meanwhile, the bureau received about 25 inquiries from local schools, industrial and commercial buildings and public utilities.

How to turn Macao Green?

In a research on how to turn Macao green, the academic add that "Increasing the proportion of renewable energy is critical for creating a sustainable, energy-efficient city. Renewable energy development, in fact, is considered the key to solving the energy and environmental crises."

India's Prime Minister Narendra Modi today reiterated his commitment to self-reliance in energy infrastructure as he outlined the country's energy transition goals and measures to meet growing...

Its small and densely populated area, however, makes it unsuitable for large-scale solar-power plants, and Macao has therefore chosen roof-top solar technology as the most effective way to utilize solar energy." (A one-square-meter solar panel can generate about 167 kWh per year in Macau.)
