OATI's GridMind Microgrid Controller enables commercial and industrial customers to operationalize DER sites such as solar, batteries, wind, generators, etc for intelligent power management.

The island of Saint Helena has entered into a 25-year power purchase agreement (PPA) for a solar, wind and battery storage microgrid project, which PASH Global claims will make it one of the "greenest" islands in the British Overseas Territories. The island has signed the PPA through its only utility Connect Saint Helena Ltd.

As such, St. Helena provides a unique case study from which lessons immediately relevant to larger nations can be drawn. Large power grids will need to address issues similar to those faced by St. Helena in order to move towards higher renewable penetration and increasingly distributed generation.
