

Smart power system Grenada

Grenada's energy portfolio needs to secure safe, reliable, high-quality electricity at the lowest possible cost for all citizens. Our approach is to encourage energy efficiency and use proven renewable energy technologies prudently to help our nation prosper economically in an environmentally sound and sustainable way.

The Public Utilities Regulatory Commission (PURC) of Grenada is inviting expressions of interest (EOIs) for a renewable energy project at the island nation's main international airport. The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels.

Off-grid solar systems are a popular choice in Grenada, which has abundant sunshine all year round. Off-grid solar systems are not connected to the main electricity grid, so they can provide a reliable source of power even in remote areas or during power outages. Off-grid solar systems typically consist of the following components:

Off-grid solar systems are a popular choice in Grenada, which has abundant sunshine all year round. Off-grid solar systems are not connected to the main electricity grid, so they can provide a reliable source of power even in remote ...

The objective of this study is to carry out an integrated assessment of the electricity system in Grenada to improve the resilience of the grid and increase the penetration of lower cost intermittent renewable generation resources. The study is to develop a prioritised and costed investment plan, listing the likely projects underway.
