

Solomon Islands asea power systems

What is the Asian Development Bank doing in Solomon Islands?

The Asian Development Bank is working in partnership with the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power. This project involves the Asian Development Bank in putting a grid-connected solar power plant into operation by SIEA.

Why should you choose ASEA power systems?

Reliability is at the heart of ASEA Power Systems. We pride ourselves on delivering unparalleled reliability, ensuring that our customers have a seamless and secure connection to shore power no matter where their journey takes them. Our products are trusted by yacht owners, marinas, and shipyards worldwide.

What is Solomon Power's capital expansion programme?

With a capital expansion programme of over SBD1 billion, Solomon Power strives to develop and implement its planned capital and infrastructure projects over the next five years that will support its mission to provide a safe, reliable and affordable supply of electricity to the Solomon Islands.

Why is the power supply in the Solomon Islands so volatile?

Currently, most of the power in the Solomon Islands is dependent on diesel generated power which uses imported fuel. This volatile energy supply structure is susceptible to soaring fuel prices, and the people want it to be rectified as soon as possible.

Does Solomon have a solar system?

Solomon has natural conditions suitable for solar power, and they are promoting renewable energy, but the grid-connected photovoltaic power generation system (hereinafter referred to as "grid-connected PV system") has not been introduced.

How many countries does ASEA power support?

Our global support network covers 127 countries and counting. ASEA Power's broad network of trusted service providers is strategically located in main ports across the globe to provide the support you need when you need it. Every ASEA shore power converter is equipped with an Isolation transformer for a crucial reason: safety.

The Q Series is ASEA's smallest and lightest shore power converter. The unit features a stackable, modular configuration ideal for refit installations and tight spaces. The 50 kVA and higher units utilize our latest technology, which allows ...

ASEA products are proudly made in the USA. ASEA is backed by a global support network in over 127 countries, ensuring any issue you may have will be resolved promptly.

Solomon Islands asea power systems

grid-connected PV system combined with commercial small-capacity power conditioner (PCS), implemented the Survey with the aim to further promote the introduction of renewable energy ...

On June 1st 2016, MAN officially handed over a new 10MW power plant to the Solomon Islands Electricity Authority (SIEA). The power station was designed with 4 x MAN 9L27/38 generator ...

In 1988 the merger between ASEA and the Swiss BBC (Brown Boverly Company) took place. With this, the Brilon factory got transferred to the ABB group, where it developed into the global center for transformers. With the sale of the Power Grids division of the ABB Group to Hitachi, the transformer plant became part of Hitachi ABB Power Grids.

ASEA Power Systems is a world leader in the design and fabrication of power conversion equipment specially designed for the marine market. Product applications include shore power converters, line voltage regulators, isolation transformers, generator management modules, clean grid converters, and custom engineered desi
