

Who is TSMC?

TSMC has been the world's dedicated semiconductor foundry since 1987, and we support a thriving ecosystem of global customers and partners with the industry's leading process technology and portfolio of design enablement solutions to unleash innovation for the global semiconductor industry. Contact us today!

Is TSMC looking for engineers in Poland?

Apart from USI, leading Taiwan-based chipmaker MediaTek already set up a R&D facility in Warsaw, Poland in early 2023. Meanwhile, as revealed by Kozaczewski, in recent months TSMC has been searching for engineering talents in Poland.

Will TSMC establish ties with Poland's photonic cluster?

In response to the growing importance of silicon photonics, TSMC introduced its COUPE (COmpact Universal Photonic Engine) advanced packaging platform in 2021. Given Poland's strong competence in photonics, it remains to be seen if TSMC will establish ties with Poland's photonic cluster.

How does TSMC contribute to global IC innovation?

Here we explore how TSMC and its innovative business model accelerate innovation in integrated circuit (IC) design and product applications. These innovations propel ICs' pervasiveness in our modern world while significantly improving our lives. Here too, we learn how TSMC contributes to global IC innovation and to Taiwan's economy.

Will Poland be a part of Europe's semiconductor strategy?

Poland is ascending to be an integral part of Europe's semiconductor strategy, especially as Intel's Wrocław facility enters operation in 2027 in synergy with its Gdansk R&D site and its advanced process fab in Magdeburg, Germany. Deepening cooperation with Taiwan is expected to further integrate Poland into the global semiconductor ecosystem.

Does Poland have a semiconductor industry?

In fact, Poland's automotive industry has underpinned its semiconductor strategy, and will continue to do so as the trend of vehicle electrification and Intelligentization becomes the main driving force of semiconductor industry growth.

TSMC Solar is your reliable partner for high-performance modules. High-efficiency CIGS thin-film modules for worldwide markets and premium crystalline silicon m...

Wynik sprawności modułu fotowoltaicznego w technologii CIGS na poziomie 16,5% potwierdził TÜV SÜD. TSMC Solar poprawił tym samym swój wcześniejszy rekordowy wynik, który wyniósł 15,7% i został osiągnięty w 2013 r.

TSMC Solar Europe GmbH. Register Ut Amtsgericht Hamburg HRB 116354 Adresse Hamburg, Deutschland Gegenstand Der Import und der Vertrieb von Solarzellen, Solarzellenmodulen und verwandten Produkten sowie in diesem Zusammenhang die Vertretung von Dritten und das Erbringen von Leistungen an Dritte. Historie Netzwerk Netzwerk wird geladen ...

Riding on the regionalization trend of semiconductor manufacturing, Poland is seeking a greater role in the global IC value chain. The Central European country comes under increasing spotlight ...

More than 300 people attended this year's event in Warsaw, Poland. Image: Solar Media. In terms of sheer capacity deployed, the Eastern European solar sector has gone from strength to strength ...

The import and distribution of solar cells, solar cell modules and related products as well as the representation of third parties and the supply of services to third parties.

Taiwan Semiconductor Manufacturing Company (TSMC) moved towards a goal of reaching net-zero emissions by 2050, signing a 20-year renewable energy joint procurement contract with ARK Power. The contract chipmaker will purchase 500GWh of solar power per year, with its suppliers to jointly subscribe for the same amount.

TSMC Solar is your reliable partner for high-performance modules. High-efficiency CIGS thin-film modules for worldwide markets and premium crystalline silicon modules for European markets. Get to know us and understand our heritage.

According to a source from the Polish political circle, the incoming government will seek to further strengthen Poland's role in the global high-tech value chain, and a subsidy package...
