

Vatican City decentralized grid

Vatican City is on track to become the 8th country in the world to generate 100% of its electricity from renewable energy, following Pope Francis' announcement about plans to build a large solar plant.

Pope Francis has unveiled a plan to transition Vatican City to solar energy as its primary source of electricity in his latest motu proprio "Fratello Sole" or "Brother Sun." The Holy Father has directed the construction of an agrivoltaic system on Vatican-owned land in Santa Maria di Galeria, located just outside Rome.

Vatican to go green by 2050 The Holy See is aiming to reduce its environment impact by embracing renewable energy sources, with the goal of zero emissions by 2050. In an interview with L'Osservatore Romano, the Governorate's Director for Infrastructures and Services explains the path undertaken by the Vatican.

Changes in water availability caused by climate change could decrease the ability of hydropower facilities to generate energy, making grid decarbonisation efforts more difficult, researchers have said.

In a letter released on June 21 entitled "Brother Sun" Pope Francis announced his intention to transition Vatican City onto 100% renewable energy using solar panels.

The Pope has ordered that a solar PV project be built in the Vatican City, with a capacity sufficient to power all of the mini-state's electricity needs.

Changes in water availability caused by climate change could decrease the ability of hydropower facilities to generate energy, making grid ...

In the heart of the Vatican, we converted 2,134m² of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO₂ each year.

Pope Francis has initiated the construction of an agrivoltaic plant within the extraterritorial area of Santa Maria di Galeria to provide energy for Vatican City. In his Apostolic Letter titled "Fratello Sole" (Brother Sun), the Pontiff emphasizes the critical role of solar energy in addressing environmental challenges, echoing themes from ...

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled Fratello Sole, or "Brother Sun."

With this new solar plant, the Vatican is taking an audacious step towards a cleaner and greener future,

Vatican City decentralized grid
