

# What type of metal is custom to make electricity rack

Main Properties of Steel  
Types of Steel  
Steel For Industrial Racking: Industrial Steel  
Advantages of Good Galvanised Steel in Industrial Racking  
As indicated above, galvanising is the immersion of steel in molten zinc at a temperature of about 450°C. This causes an electrochemical reaction that provides the material with greater protection against corrosion and extreme environmental conditions. This product also stands out as a durable scratch-resistant coated metal, and has a satin appearance...
